

## **GoD FAQ**

### **1. What is GoD?**

This is the game server of BSNL where you can find large no of exciting games. And can play the games at your choice.

### **2. What is the URL of the GoD site?**

The address of GoD site is <http://bsnl.indiagames.com/>

### **3. What are the tariffs of GoD?**

There are two plans at present: premium plan of Rs 200/- and casual plan of Rs 100/- per month

### **4. Can I play games in multiplayer mode - if so, how?**

The BSNL Games on Demand service enables you to play games in multiplayer mode, as long as the game contains a multiplayer launch option. To play a game in multiplayer simply select the Multiplayer option in the Main Menu of the game.

### **5. Are games cached every time I use them?**

Cached data that is stored on your PC does not have to be cached again. Each game requires a certain amount of cached data in order for you to start using the game. Once the required data is cached, the game launches and you can begin using it.

The EXEtender Player continuously stays one step ahead of the game and caches data files before they are required by the game. This ensures a user experience of the highest quality, along with the shortest possible launch time for the game.

### **6. How do I launch a game?**

There are 2 ways to launch a game:

1. Click the Play button on one of the game list pages, or
2. Click the Play button on the game page

The EXEtender Player opens and starts to pre-cache the game. You can begin using the game as soon as the necessary pieces of the game are on your computer. The Play button will be activated on the EXEtender Player when the game is ready.

### **7. Can I play the games without the Internet connection?**

No, you must be connected to the Internet in order to play the games. There are two reasons for this:

1. To play, you must launch them using the "Play" button on the BSNL Games on Demand site.
2. The first time you play a game on BSNL Games on Demand you will download the initial cache or "chunk" of the game -- enough of the game to begin playing. While you play, additional components of the game are downloaded in the background.

### **8. Can I access my GoD account from any PC?**

Yes! You can access your GoD account from any PC, as long as you are connecting from BSNL Broadband Network.

### **9. Why do I have to pre-cache a game?**

Pre-caching is the process by which parts of the game are loaded into your EXEtender Player to make the game ready for you to use without waiting for the whole game to download. The caching process continues while you use the game.

The EXEtender Player continuously stays one step ahead of the game and caches data files before they are required by the game. This ensures that you experience the highest quality gaming experience, along with the shortest possible launch time for the game.

When you launch a game for the first time, a progress bar appears on your EXEtender Player that indicates the estimated caching time for the game.

### **10. How long does it take to cache a game?**

It depends on the game! Typically it may take anywhere from a few seconds to 30 minutes - the faster your connection, the quicker your caching time.

Caching usually takes longest when you launch a game for the first time.

The game should launch much quicker when you run it again.

### **11. Are games cached every time I use them?**

Cached data that is stored on your PC does not have to be cached again. Each game requires a certain amount of cached data in order for you to start using the game. Once the required data is cached, the game launches and you can begin using it.

The EXEtender Player continuously stays one step ahead of the game and caches data files before they are required by the game. This ensures a user experience of the highest quality, along with the shortest possible launch time for the game.
